

PROGRAM FOR STUDENTS WITH AN AUTISTIC SPECTRUM DISORDER

Students with Autistic Spectrum Disorders participate in all areas of the school curriculum and are involved in many extracurricular areas of school life.

Students with Autistic Spectrum Disorders are identified through the Education Adjustment Program (EAP) process with a verification of their diagnosis and the completion of an educational Profile. Student needs and goals are identified in an Individual learning Plan (ILP) and students participate in regular subjects and targeted tutorial programs.

The support program aims to develop student independence and to ensure that they are given every opportunity to access, participate and succeed in the curriculum and to make a successful transition to post school pathways.
