

## **PROGRAM FOR STUDENTS WITH VISION IMPAIRMENT**

Students with vision impairment participate in all areas of the school curriculum and are involved in many extracurricular areas of school life. Students participate in a fully inclusive program and are supported by the Metropolitan Region Advisory Visiting Teacher Service.

Students with Vision Impairment are identified through the Education Adjustment Program (EAP) process including a verification of their diagnosis and the completion of an educational Profile. Student needs and educational goals are identified in an Individual Learning Plan (ILP).

The program aims to develop student independence and to ensure visually impaired students are given every opportunity to access, participate and succeed in the curriculum and to make a successful transition to post school pathways.

The Metropolitan North Region Special Education Program for secondary-aged students with high support needs for Vision Impairment is situated at Aspley State High School.
